

CSE1729 Honor Code

CSE1729 has high expectations for its students, both scholastically and ethically. As a CSE1729 student, it is your job to uphold the course's honor code, *both by your own actions and by reporting violations.*

Problem sets and exams Student problem sets and exam solutions are to represent the sole intellectual effort of the student submitting the work. In particular, this precludes usage or adaptation of material from the internet, peers, etc. (Of course, all course materials are fair game.)

Laboratory assignments Students are encouraged to collaborate on lab assignments; the final submitted product, however, must be prepared by the student submitting the work.

Plagiarism and academic misconduct Plagiarism and academic misconduct will be aggressively pursued by course staff according to University regulations. See

<https://community.uconn.edu/academic-integrity-undergraduate-faq/>

for details. CSE1729 adopts the following amplifications of the University's guidelines for academic misconduct.

- Any incidence of plagiarism or academic misconduct will result in, at least, one letter grade reduction for the final course grade in addition to a zero for the affected course deliverable. Penalties may be more severe depending on the case.
- Any repeat offense will result in an F for the course. *Penalties may be more severe depending on the case.*

In all cases, incidents of plagiarism or academic misconduct will be reported and filed at the department and the University. Students who wish to take CSE1729 *must pledge* to uphold the honor code above.

Jared Moore

Printed Name

By signing below, I pledge to uphold and abide by the conditions of the CSE1729 honor code and the University's code of academic conduct.
